vesting dates, no breach of the employee’s employment terms and conditions or any other employment-related agreement, employee handbook, non-compete and confidentiality agreements or any agreement with the Company and achievement of both the employee’s individual performance goals by the employee and the Company’s operation objectives by the Company during the vesting period are required to receive the vested shares. The vesting period would be from 2021 to 2024 and in accordance with the issue rule approved under each effective registration. The percentage of the maximum number of the shares vesting on any particular year shall comply with the issue rule approved under each effective registration. The actual percentage and number of the shares vesting on any particular year will be based on the employee’s achievement of individual performance goals and the Company’s achievement of operational objectives of such particular year. The measuring of the achievement level of the Company’s operational objective for vested shares shall be calculated based on the index on an annual basis and on a cumulative basis, and where the periods for measuring overlap, the period with the highest performance for the particular index shall be the period used for measuring. The share calculation shall be rounded down to the nearest whole share.

(II) The individual performance goals are the employee’s year-end performance rating for the year preceding the vesting date at “I” rating or higher for the performance year preceding each vesting date and the employee’s achievement of job performance criteria (as determined by the Company), which will be set by the Company and agreed with the employee. The Company’s operational objectives include the following four indexes: (1) the Company’s total shareholder return (“TSR”) compared to that of Taiwan’s top 50 companies by market cap in electronic components industry; (2) revenue growth rate; (3) gross margin (“GM%”); and (4) operating margin (“OPM%”). Each index has its own threshold level and target level. The percentage of the vested shares would be 0% if the Company’s operational performance result is below the threshold level; 50% if the performance result meets or exceeds the threshold level; and 100% if the performance result meets or exceeds the target level. For rounding rules applied to calculations, it shall be rounded down to the nearest integer to determine if the threshold level or the target level is achieved. If the performance result is
greater than the threshold but less than the target level, the percentage of vested Shares determined by the applicable index shall be calculated by the interpolation method. For purposes of determining if the threshold level or the target level is achieved, calculations shall be rounded down to the nearest whole percent, while, for performance results between the threshold level and the target level, calculations will be rounded up or down to the nearest hundredth percent. The weighting and the range of threshold to target level of each index are set forth in the table below, and the threshold and target levels for each index will be set by the Company for each award under the program and specified in the applicable Restricted Stock Award Agreement with the employee. The judgement of the achievement level of the indexes shall be based on the Company’s consolidated financial statements certified by a certified public accountant for the corresponding performance periods.
